

NEBRASKA

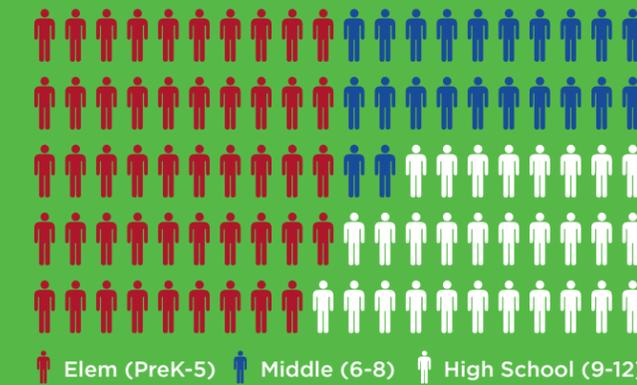

NeSA Composite by District

MATH | READING | SCIENCE: 2010-2013

ENROLLMENT³

303,242 Students

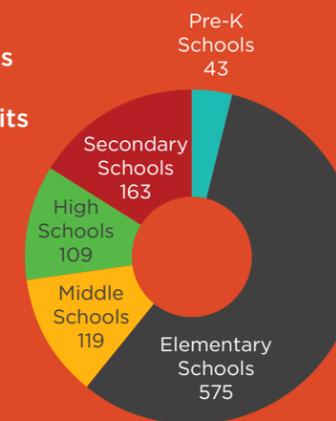

“Data must be used to make improvements not just by looking backwards but by also using them to address anticipated future issues. I like to use the term ‘premeditate’ to describe this use of data to fix problems before they occur rather than using them to ‘remediate’ problems that already occurred.”

— Lee Jenkins

SCHOOLS²

249 Public School Districts
1,009 Public Schools
17 Educational Service Units

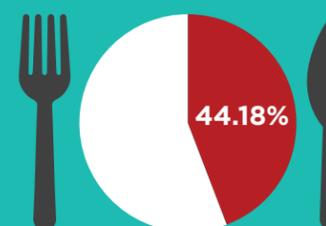

GRADUATION RATE

2013 Cohort¹
19,391 Students

FREE/REDUCED PRICE MEALS¹ (Economically Disadvantaged)

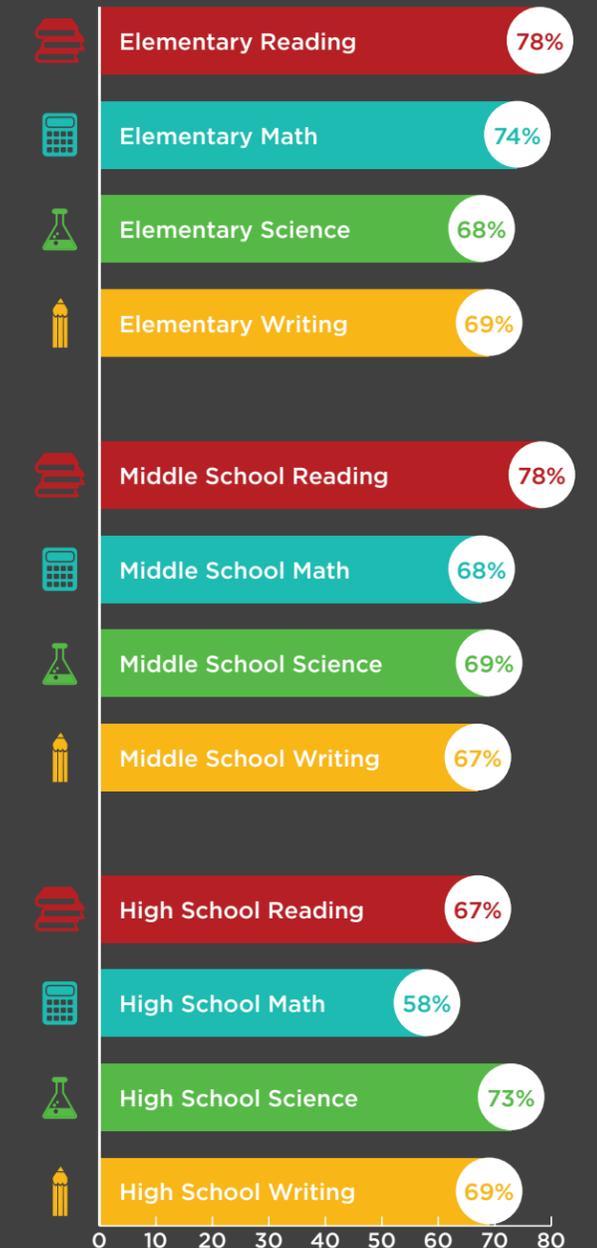

ATTENDANCE RATE¹

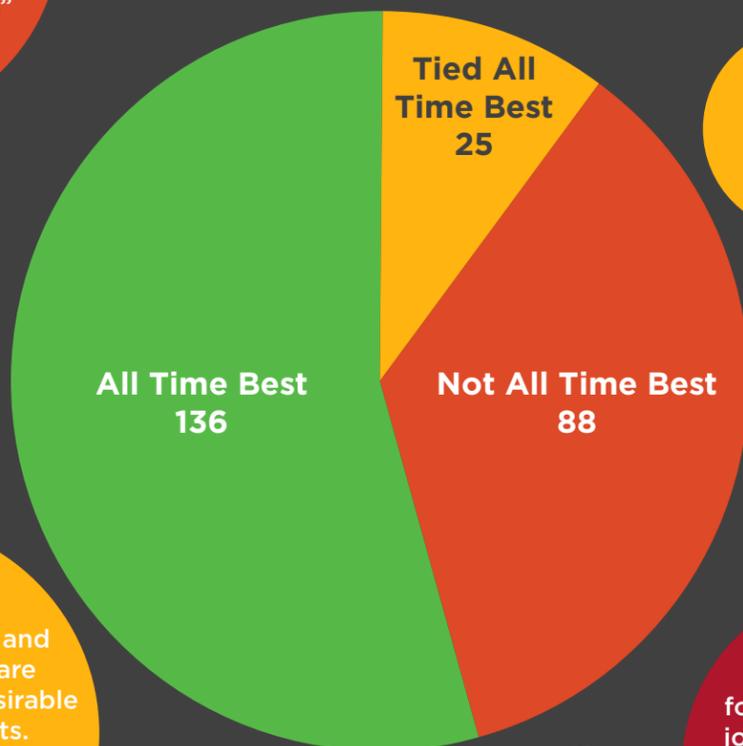

STUDENT PERFORMANCE¹

Nebraska State Accountability: NeSA Scores Meets or Exceeds Expectations

ALL TIME BEST

“Oklahoma City teacher Heather Sparks gave me the phrase ‘all-time best’ in 2001. Now ATB is a much more common word in many schools than even IEP.”

— Lee Jenkins

“There is joy for both students and teachers when the class has an ATB.”

— Lee Jenkins

“Education is not a game and the statistics appropriate and desirable for games are inappropriate and undesirable for nonathletic events. The responsibility of educators is to maximize winners and minimize losers.”

— Lee Jenkins

“The real numerical goal is to score better than last year. Small gains are improvement and should be celebrated.”

— Lee Jenkins

“Other than costs for staff development, joyful data—instead of the wrong statistics education inherited years ago—are free.”

— Lee Jenkins
